

Look at this picture and the picture on the front page. Which animal lacks a partner to make a couple?

Solution

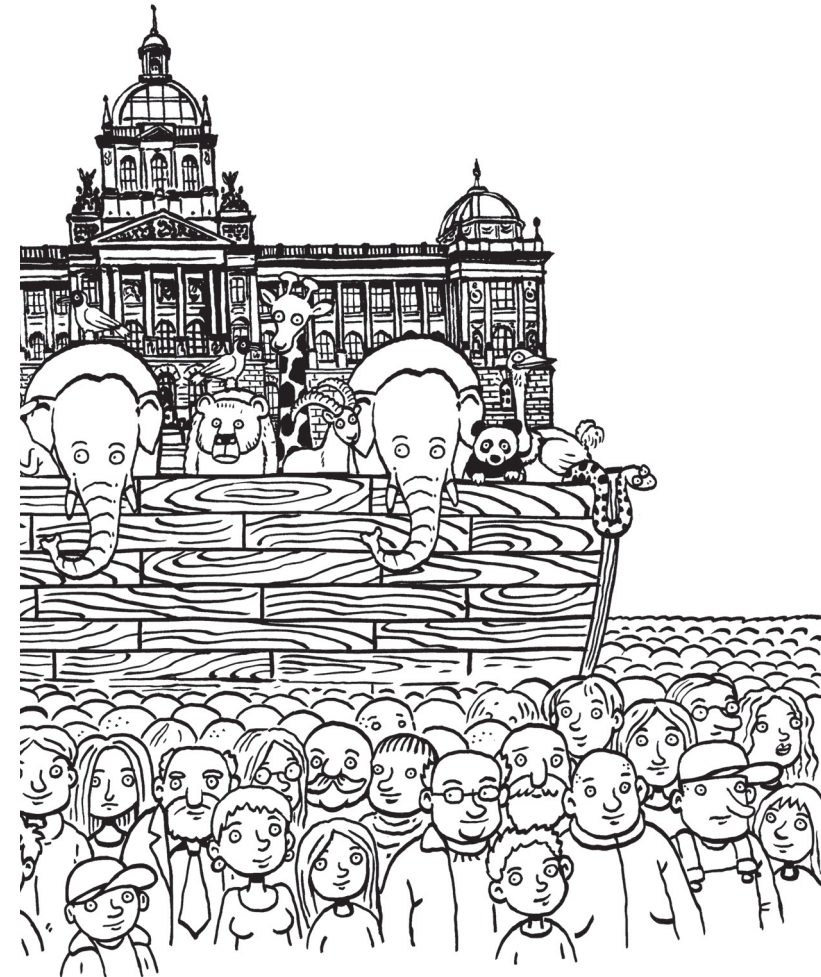

1. Red
2. Giant panda
3. Man
4. Wild horse, originally from China and Mongolia, it was saved from extinction by the zoological gardens.
5. We will find a shelter for the animals in the zoological garden. We will establish natural parks for the animals, where nobody will disturb them.
6. No. Trading rare natural products harms the animals.
7. 1C, 2D, 3B, 4A
8. 8 meters
9. Volcanoes (volcanism), impacts by space objects
10. Palaeontologist
11. Steller's (or Northern)
12. 1 year
13. Screwing bug

NOAH'S ARK

Welcome Aboard

A guide to an exhibition for younger primary school children

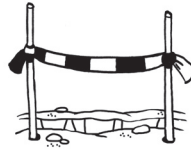

NATIONAL
MUSEUM

New building of the National Museum
Vinohradská 1, 110 00 Prague 1

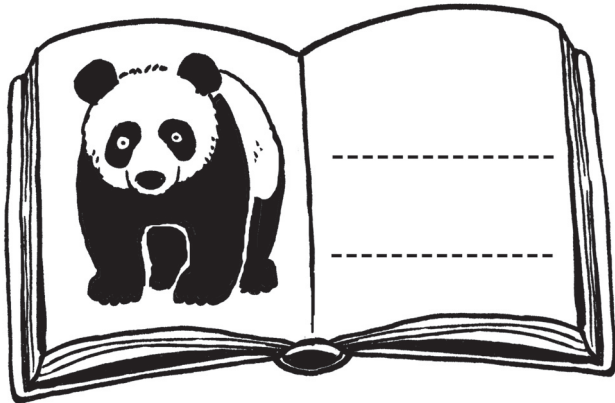

1. Which colour do we use when we want to warn of a danger?

- A green
- B grey
- C red

I AM A LAUGHING GULL, AND MY NAME IS EDA. I AM NOT LAUGHING NOW, THOUGH, BECAUSE THIS COLOUR MEANS DANGER.

2. What is the name of the animal that has become the symbol of the endangered species?

3. What is the greatest threat for the animals in nature today?

.....

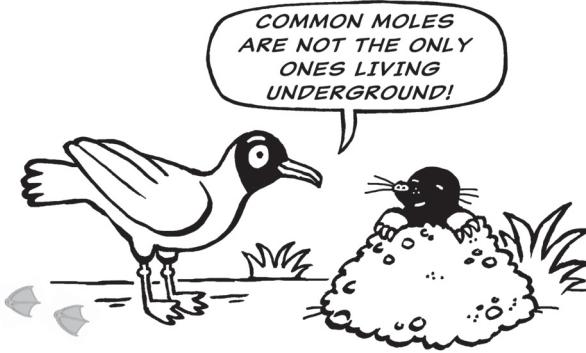

.....

.....

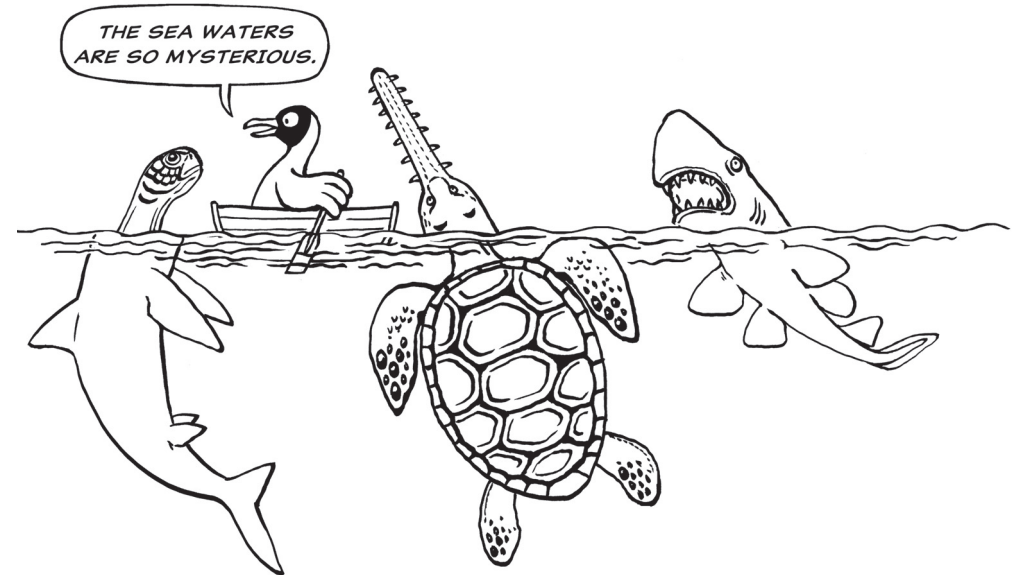

.....

13. Meet the animals living under the ground and cross the name, which Eda the gull made up.

- A Pink fairy armadillo
- B Golden mole
- C Screwing bug
- D Marsupial mole

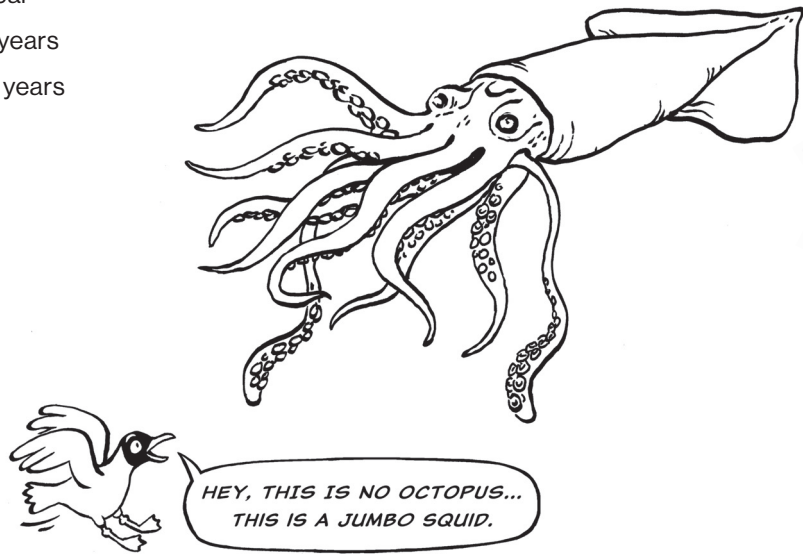

Look at the exhibited animals and tell the gull what they really look like. Who switched bodies with who?

12. Read the panel to find out how long the jumbo squid lives.

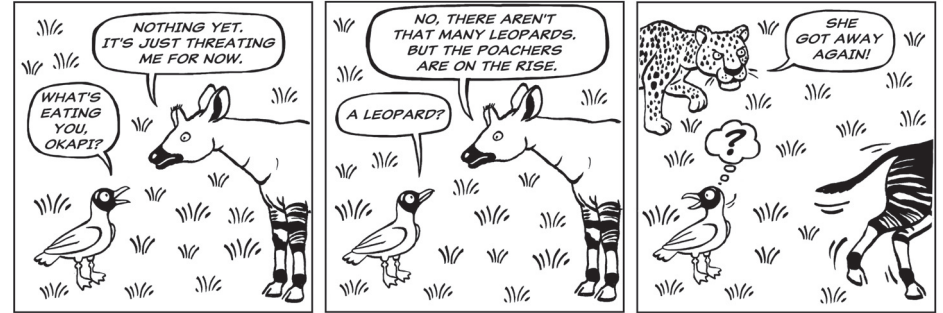

- A 1 year
- B 10 years
- C 50 years

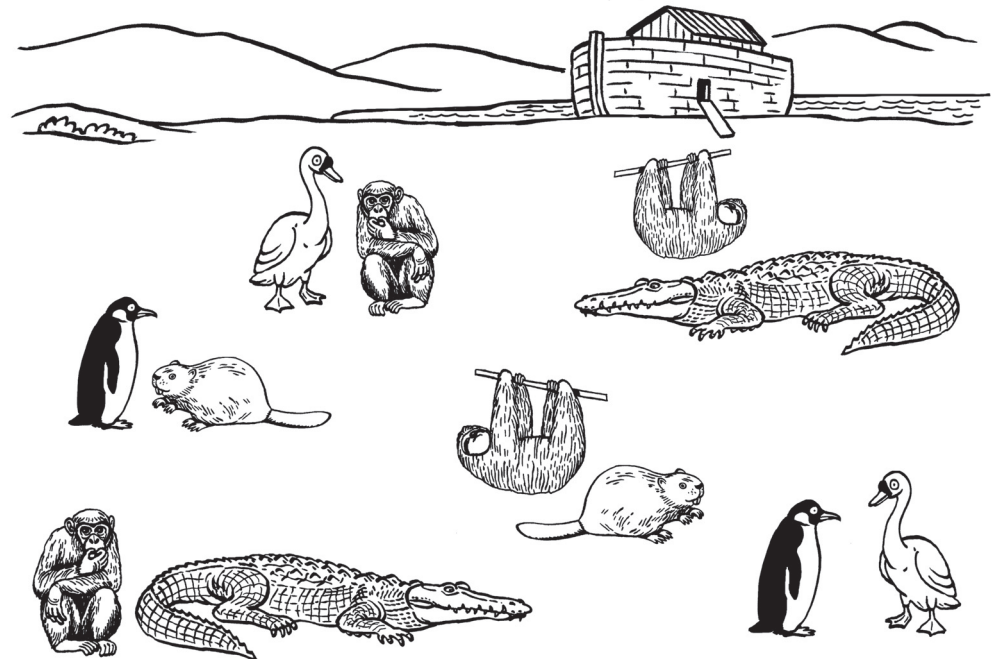

Look at the animals and draw the missing horns to the ibex.

ENTRANCE

**The Flood is coming!
Connect the animals to make couples, so that they can go aboard.**

Draw or write which of the exhibited products of nature you like, so that you can have your own collection.

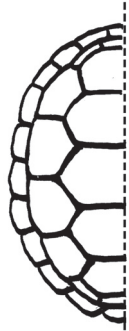

MY COLLECTION

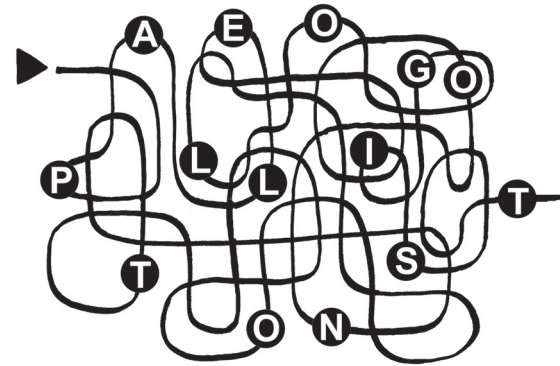

LOOK AT THE PRODUCTS OF NATURE IN THE ANTIQUE SHOW CASES.

Fix the broken museum objects.

10. Untangle the letter mesh to find out the name of the scientist who dug up the bones of the extinct animals.

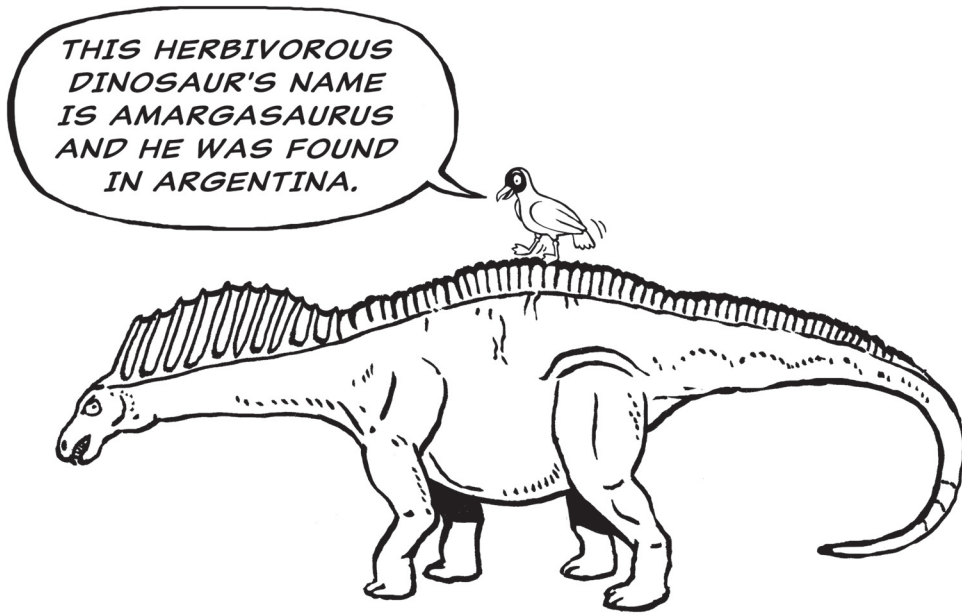

11. Find out from the legend by the exhibit what the name of the largest species of seal is.

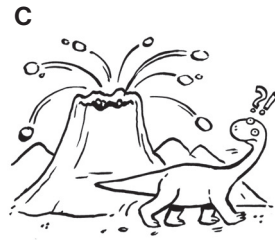

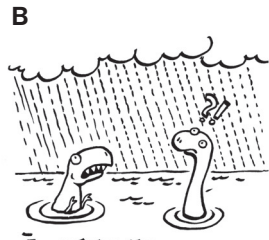

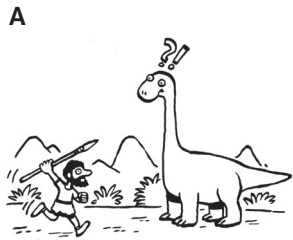

8. Look at him and say how long he was.

GROUND FLOOR

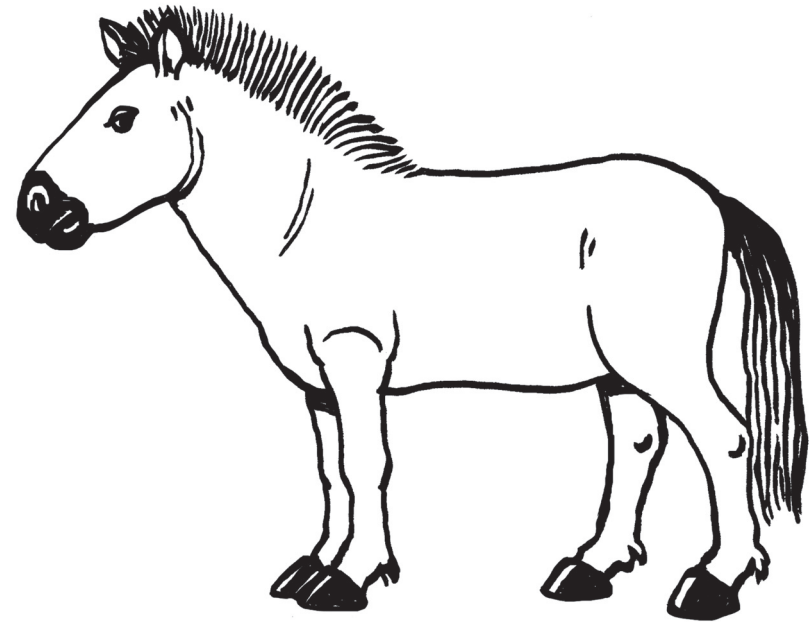

- A 1 meter
- B 8 meters
- C 20 meters

9. Find out from the panel why the dinosaurs became extinct.

GALLERY

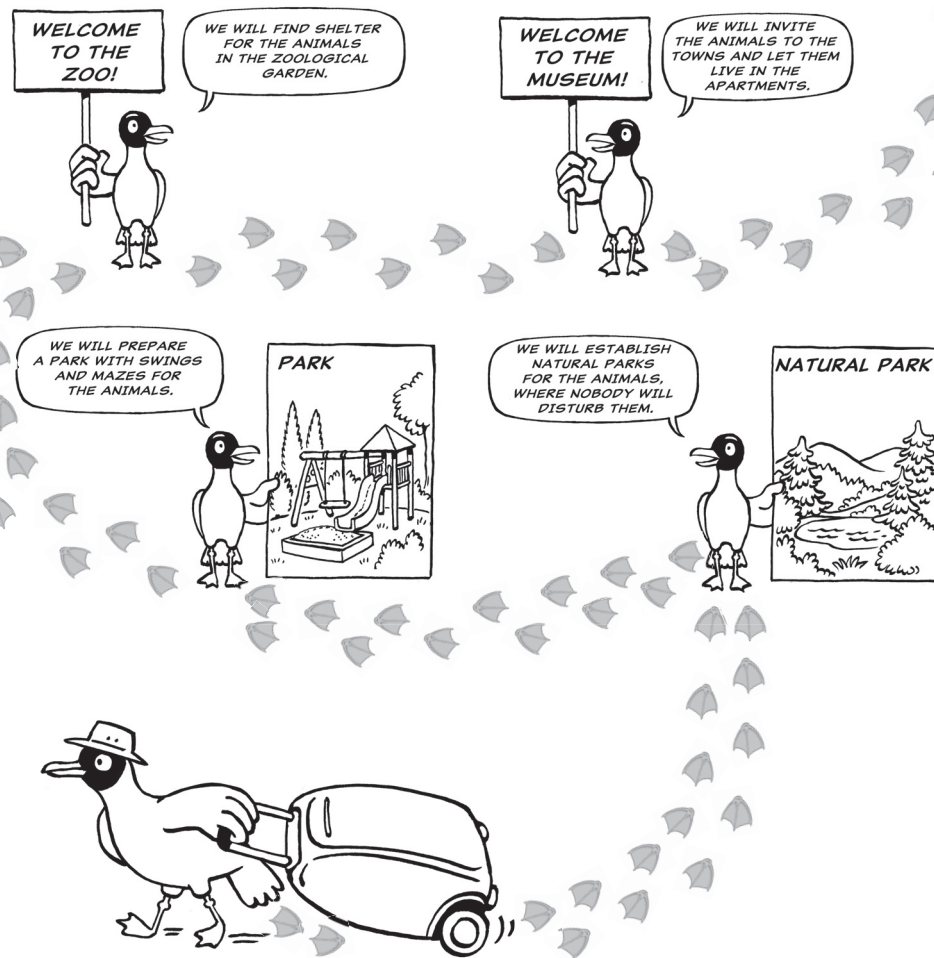

4. Find out more about the Przewalski's horse and tick the statements that are true.

It is: **A** domestic horse **B** wild horse

It comes from: **A** China and Mongolia **B** Italy and Spain

It was saved from extinction by: **A** zoological gardens **B** museums

5. How can we protect the endangered animals? Look at the show cases and panels at the gallery and pick the pictures where the gull is right.

6. Find out on the panel whether Eda can bring home a cactus, a turtle's shell and an elephant's tusk from his holiday.

- A Yes. Live animals cannot be transported, the plants are not regulated
- B No. Trading rare products of nature harms the animals.

7. The animals or plants that are spread by people to regions where they never existed can be harmful for the original nature. Connect the legends with the pictures to understand these imported species better.

- A Giant hogweed
- B Potato bug
- C American mink
- D Red-eared slider
